Game changing Vacuum Airtight Container

Fresh Food & HULOCK

Vacuum airtight container

"Hulock's Advantages"

- ♻ Convenient to use, no troublesome fasteners
- ♻ lasting airtight technology
- ♻ Easy to use; vacuum pump
- ♻ Transparent, light weight & ECO friendly product
- ♻ Outstanding airtightness of silicone nozzle & check valve
- ♻ Easy maintenance – detachable silicone nozzle

※ Hulock is made of eco friendly Material SAN: (Styrene Acrylonitrile)+Silicone.

SAN is a pure polyester material that does not contain added BPA or other harmful plasticizers.

[Hulock products]

▶ Hulock Square Vacuum Airtight Container No.3 (Large)

Length: 180mm Width: 90mm Height: 140mm
(Total Capacity: 1250ml)

▶ Hulock Square Vacuum Airtight Container No.2 (Medium)

Length: 155mm Width: 70mm Height: 115mm
(Total Capacity: 800ml)

▶ Hulock Square Vacuum Airtight Container No.1 (Small)

Length: 135mm Width: 55mm Height: 55mm
(Total Capacity: 350ml)

▶ Hulock Round Vacuum Airtight Container No.3 (Large)

Diameter: 160mm Height: 90mm
(Total Capacity: 1000ml)

▶ Hulock Round Vacuum Airtight Container No.2 (Medium)

Diameter: 135mm Height: 70mm
(Total Capacity: 600ml)

▶ Hulock Round Vacuum Airtight Container No.1 (Small)

Diameter: 105mm Height: 55mm
(Total Capacity: 300ml)

HULOCK Keep your food fresh in Hulock's Vacuum Airtight Container!

► Hulock's Exclusive Vacuum Pump

Size: Diameter 62mm x Height 130 mm / Country of manufacture: South Korea
 Material: ABS + Silicone rubber / Use: vacuum pump

► Hulock Square Vacuum Airtight Container Set

Comprises: Hulock Square Vacuum Airtight Container No.1 (Small), Hulock Square Vacuum Airtight Container No.2 (Medium), Hulock Square Vacuum Airtight Container No.3 (Large)
 Material : SAN (Body & Lid) + Silicone rubber
 Purpose: Food storage container
 (Min & Max temperature tolerance: -15℃~90℃)

► Hulock Round Vacuum Airtight Container Set

Comprises: Hulock Round Vacuum Airtight Container No.1 (Small), Hulock Round Vacuum Airtight Container No.2 (Medium), Hulock Round Vacuum Airtight Container No.3 (Large)
 Material : SAN (Body & Lid) + Silicone rubber
 Purpose: Food storage container
 (Min & Max temperature tolerance -15℃~90℃)

► Hulock Square Vacuum Airtight Container Gift Set

Comprises: Hulock Square Vacuum Airtight Container No.1 (Small), Hulock Square Vacuum Airtight Container No.2 (Medium), Hulock Square Vacuum Airtight Container No.3 (Large) & Vacuum Pump
 Material : SAN (Body & Lid) + Silicone rubber
 Purpose: Food storage container
 (Min & Max temperature tolerance: -15℃~90℃)

► Hulock Round Vacuum Airtight Container Gift Set

Comprises: Hulock Round Vacuum Airtight Container No.1 (Small), Hulock Round Vacuum Airtight Container No.2 (Medium), Hulock Round Vacuum Airtight Container No.3 (Large) & Vacuum Pump
 Material : SAN (Body & Lid) + Silicone rubber
 Purpose: Food storage container
 (Min & Max temperature tolerance -15℃~90℃)

► Hulock All Inclusive Vacuum Airtight Container Gift Set

Comprises: Hulock Square Vacuum Airtight Container No.1 (Small), Hulock Square Vacuum Airtight Container No.2 (Medium), Hulock Square Vacuum Airtight Container No.3 (Large), Hulock Round Vacuum Airtight Container No.1 (Small), Hulock Round Vacuum Airtight Container No.2 (Medium), Hulock Round Vacuum Airtight Container No.3 (Large) & Vacuum Pump
 Material : SAN (Body & Lid) + Silicone rubber
 Purpose: Food storage container
 (Min & Max temperature tolerance: -15℃~90℃)

Hulock is the choice for those who know real value.

Hulock will revolutionize airtight container storage. Airtight containers should not only prevent air getting in but should also make the inside of the container a vacuum and so prevent the growth of germs. With its new Vacuum Airtight technology, Hulock will re-write the rules for airtight containers giving you fresher food.

Hulock's vacuum pump expels the air inside the container. By maintaining a vacuum, Hulock can prevent the growth of microbes and keeps food fresh longer.

【 Directions for using Hulock Vacuum Pump 】

Hulock is an airtight conditioner system that uses different methods from all other airtight containers. Below directions will help you to make the inside of the container a vacuum.

Put food in the container. Fill up to 85% capacity.

Press the lid and close it.

Place the vacuum pump on the indentation in the middle of the lid.

Pump it for 3~5 times to make the container airtight.

- Before using please make sure to check that there aren't any foreign substances on silicone nozzle or valve area.
- Foreign substances on silicone nozzle or valve area can cause ineffective airtightness.
- If vacuum process is not working, please check again that the silicone nozzle & valve areas are clear.

【 Easy to attach and detach silicone nozzle makes it easier to maintain Hulock Airtight Containers. 】

Grab silicone nozzle and pull it out from the indentation. You can easily remove it from the lid.

Place the nozzle on the lid with the coupling area facing down. Press it evenly with your fingers.
